

The Federal Housing Administration (FHA) Energy Efficient Mortgage Manufactured Home Energy Report

To apply for FHA's Energy Efficient Mortgage for manufactured homes, complete this **Energy Report**. This Report is based on information developed by the Manufactured Housing Research Alliance (MHRA). MHRA is a non-profit research organization responsible for administrative, technical and design guidance and quality control verification for manufactured homes meeting the requirements of US EPA's ENERGY STAR® for Homes. The information provided for this home is based on procedures and methods developed as part of the manufactured homes provisions of ENERGY STAR for Homes.

Professional judgment was employed in the evaluation of the property's energy features and systems efficiencies. The property is deemed "energy efficient," and the calculation of the energy savings amounts shown below is made in accordance with procedures established by the US EPA and as described in the publication: **ENERGY STAR® Qualified Manufactured Homes: Design, Manufacturing, Installation and Certification Procedures, 4th Edition**. This document is available on the web at: (http://www.mhrahome.org/pages/es_manufact.htm).

Complete Section A below and the attached **Home Specification Sheet** for each home to be evaluated. Submit the completed report to:

Manufactured Housing Research Alliance
2109 Broadway, Suite 200
New York, NY 10023
